

IPG154 – Insertion of biological slings for stress urinary incontinence

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Repair of stress incontinence by suprapubic sling (65935005)

OPCS-4 code(s):

Depending on the exact procedure performed one of the following OPCS-4 codes is selected:

M51.1 Abdominoperineal suspension of urethra
Includes: Abdominovaginal suspension of urethra

M52.1 Suprapubic sling operation

M52.2 Retropubic suspension of neck of bladder

M52.3 Colposuspension of neck of bladder

Note: OPCS-4 code **Y27.1 Autograft to organ NOC**, **Y27.2 Allograft to organ NOC** or **Y27.3 Xenograft to organ NOC** is assigned in addition to one of the above codes if the information is available.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Female urinary stress incontinence (60241006)

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
