

IPG179 - Percutaneous cementoplasty for palliative treatment of bony malignancies

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Fluoroscopy guided cementoplasty (431312000)

OPCS-4 code(s):

W35.1 Introduction of therapeutic substance into bone

or

W35.5 Therapeutic percutaneous puncture of bone

Y53.4 Approach to organ under fluoroscopic control

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Malignant neoplasm of bone (428281000)

Primary malignant neoplasm of bone (93725000)

Secondary malignant neoplasm of bone (94222008)

ICD-10 code(s):

C40.- Malignant neoplasm of bone and articular cartilage of limbs

or

C41.- Malignant neoplasm of bone and articular cartilage of other and unspecified sites

or

C79.5 Secondary malignant neoplasm of bone and bone marrow

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
