

IPG205 - Fetal cystoscopy for the diagnosis and treatment of lower urinary outflow tract obstruction

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Fetal cystoscopy (841061000000104)

OPCS-4 code(s):

Depending on whether the procedure is diagnostic or therapeutic, either:

R02.8 Other specified diagnostic endoscopic examination of fetus

or

R01.8 Other specified therapeutic endoscopic operations on fetus

A code from **Y95.- Gestational age** must be assigned in a subsidiary position where this information is available.

Y53.2 Approach to organ under ultrasonic control

A site code can be added as appropriate

Note: If both diagnostic and therapeutic procedures are carried out together, only the code for the therapeutic procedure would be needed.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Urinary outflow obstruction (252028009)

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
