

IPG49 Radiotherapy for age-related macular degeneration

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Destruction of lesion of retina by radiation therapy (231764006)

OPCS-4 code(s):

C82.3 External beam radiotherapy to lesion of retina NEC

Includes: Radiotherapy to lesion of retina NEC

X65.4 Delivery of a fraction of external beam radiotherapy NEC

Y91.- External beam radiotherapy or O44.- Other external beam radiotherapy

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Age related macular degeneration (267718000)

ICD-10 code(s):

H35.3 Degeneration of macula and posterior pole

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see <u>here</u>. Further Classifications information, see <u>here</u>.
