

## IPG584 Uterine suspension using mesh (including sacrohysteropexy) to repair uterine prolapse

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### Procedure:

#### OPCS-4 code(s):

##### **Q54.4 Suspension of uterus using mesh NEC**

Plus one of the following codes where the specific type of mesh is known:

Or

##### **Y28.1 Insertion of synthetic mesh into organ NOC**

Or

##### **Y28.2 Insertion of biological mesh into organ NOC**

Or

##### **Y28.3 Insertion of composite mesh into organ NOC** *(if type of mesh is known)*

Plus

##### **Y75.2 Laparoscopic approach to abdominal cavity NEC** *(if performed laparoscopically)*

Or

##### **Q54.5 Sacrohysteropexy**

Plus

##### **Y28.4 Insertion of mesh into organ NOC**

Or

##### **Y28.1 Insertion of synthetic mesh into organ NOC**

Or

##### **Y28.2 Insertion of biological mesh into organ NOC**

Or

##### **Y28.3 Insertion of composite mesh into organ NOC**

Plus

##### **Y75.2 Laparoscopic approach to abdominal cavity NEC** *(if performed laparoscopically)*

### Diagnosis or health condition:

**ICD-10 code(s):**

**N81.2 Incomplete uterovaginal prolapse**

**N81.3 Complete uterovaginal prolapse**

**N81.4 Uterovaginal prolapse, unspecified**

**Q51.8 Other congenital malformations of uterus and cervix**

### **Clinical coding recommendations for NICE guidance**

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
