

IP1566 Intramuscular diaphragm stimulation for ventilator-dependent chronic respiratory failure caused by motor neurone disease

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number 22099.

OPCS-4 code(s):

A70.1 Implantation of neurostimulator into peripheral nerve

Y75.2 Laparoscopic approach to abdominal cavity NEC

Z53.1 Diaphragm

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number 22099.

ICD-10 code(s):

J96.1 Chronic respiratory failure

G12.2 Motor neuron disease

Please note the fifth character subdivisions at ICD-10 category **J96 Respiratory failure, not elsewhere classified** indicate the type of failure and must always be assigned whether the type has been specified (0,1) or unspecified (9).

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
