

## IPG631 Subcutaneous automated low-flow pump implantation for refractory ascites caused by cirrhosis

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### Procedure and device:

#### SNOMED CT preferred term (concept ID)

Subcutaneous implantation of peritoneal drainage pump system (1101961000000102)

#### OPCS-4 code(s):

**T46.2 Drainage of ascites NEC**

**Y75.2 Laparoscopic approach to abdominal cavity NEC**

**M49.8 Other specified other operations on bladder**

**Y75.2 Laparoscopic approach to abdominal cavity NEC**

**Y02.1 Implantation of prosthesis into organ NOC**

### Diagnosis or health condition:

#### SNOMED CT preferred term (concept ID)

Refractory ascites (470758004)

#### ICD-10 code(s):

**K74.6 Other and unspecified cirrhosis of liver**

Or

**K70.3 Alcoholic cirrhosis of liver**

Plus

**R18.X Ascites**

**Note:** Code R18.X is classified to ICD-10 **Chapter XVIII Signs, symptoms and abnormal laboratory findings**. Generally, codes from this chapter are only assigned where no specific diagnosis has been made that explains the symptom. However, these codes may be used in a secondary position to a code for a specific

diagnosis, where a symptom is treated as a problem in its own right. Consequently, **R18.X** may be sequenced in a secondary position.

### **Clinical coding recommendations for NICE guidance**

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
