

P379/2 Laparoscopic cerclage for cervical incompetence to prevent late miscarriage or preterm birth

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Laparoscopic cerclage of cervix (840831000000107)

OPCS-4 code(s):

In pregnant woman:

R12.1 Cerclage of cervix of gravid uterus

Y75.2 Laparoscopic approach to abdominal cavity NEC

Note: Codes in category **Y95.- Gestational age** must be assigned in a subsidiary position where this information is available.

In non-pregnant woman:

Q05.1 Repair of cervix uteri NEC

Includes: Cerclage of cervix of non-gravid uterus

Y75.2 Laparoscopic approach to abdominal cavity NEC

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Cervical incompetence (17382005)

ICD-10 code(s):

In pregnant woman:

O34.3 Maternal care for cervical incompetence

In non-pregnant woman:

N88.3 Incompetence of cervix uteri

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
