

## IPG664 Irreversible electroporation for primary liver cancer

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### Procedure and device:

#### SNOMED CT preferred term (concept ID)

Percutaneous irreversible electroporation ablation of neoplasm of liver using computed tomography guidance (716756004)

#### OPCS-4 code(s)

**J12.8 Other specified other therapeutic operations on liver**

**Y12.3 Electrochemotherapy to lesion of organ NOC**

Includes: Electroporation to lesion of organ NOC

**Y53.- Approach to organ under image control**

Or

**Y68.- Other approach to organ under image control**

**Note:** Codes in category **Y53 Approach to organ under image control** and **Y68 Other approach to organ under image control** are used as additional codes for any procedure that uses image control that may or may not be performed via percutaneous approach.

When a procedure has been performed using image control and the code that classifies the procedure does not state the type of image control used, then a code from these categories must be assigned. If the specific method of image control is not stated, the fourth-character **.9** must be assigned.

### Diagnosis or health condition:

#### SNOMED CT preferred term (concept ID)

Malignant neoplasm of liver (93870000)

#### ICD-10 code(s):

**C22.9 Malignant neoplasm of liver, unspecified**

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
