

IP1956 Image-guided transperineal laser ablation (TPLA) for treating lower urinary tract symptoms caused by benign prostatic hyperplasia

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

M70.8 Other specified other operations on outlet of male bladder
Y08.3 Laser destruction of organ NOC
Y53.2 Approach to organ under ultrasonic control
Z42.2 Prostate

Diagnosis or health condition:

ICD-10 code(s):

N40.X Hyperplasia of prostate
The appropriate code(s) to classify the lower urinary tract symptoms

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
