

IP2082 - Venoarterial Extracorporeal membrane oxygenation (VA ECMO) for refractory cardiac arrest

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

X58.1 Extracorporeal membrane oxygenation

Diagnosis or health condition:

ICD-10 code(s):

I46.0 Cardiac arrest with successful resuscitation

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information see [NHS England Digital Clinical Classifications](#).
