

IP2083 - Venoarterial Extracorporeal membrane oxygenation (VA ECMO) for postcardiotomy cardiogenic shock

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

X58.1 Extracorporeal membrane oxygenation

Diagnosis or health condition:

ICD-10 code(s):

T81.1 Shock during or resulting from a procedure, not elsewhere classified

Y83.8 Surgical operation and other surgical procedures as the cause of abnormal reaction of the patient, or of later complication, without mention of misadventure at the time of the procedure, Other surgical procedures

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information see [NHS England Digital Clinical Classifications](#).
