

# Patient decision aids information

Decision aids

Published: 2 April 2019

[www.nice.org.uk](http://www.nice.org.uk)

Patient decision aids (PDAs) help people decide on healthcare options. They provide evidence-based information on the options available, along with likely outcomes, benefits, harms and uncertainties.

They should be used to inform conversations between a person and their healthcare professional, supporting them to make informed choices in line with their personal values and preferences.

Our [process guide outlines how we develop our PDAs](#).

See our PDAs (PDFs only) on:

- [Surgery for stress urinary incontinence](#)
- [Surgery for uterine prolapse](#)
- [Surgery for vaginal vault prolapse](#)
- [Treating complications from mesh used for pelvic organ prolapse – Options for women referred to specialist centres](#)
- [Treating complications from mesh used for stress urinary incontinence – Options for women referred to specialist centres](#)

There is also a [user guide for the PDA on surgery for stress urinary incontinence](#), a [user guide for the PDA on surgery for uterine prolapse](#) and a [user guide for the PDA on surgery for vaginal vault prolapse](#).
