

Evidence reviews – May 2019

Evidence review

Published: 1 May 2019

www.nice.org.uk

In May 2019, we reviewed the evidence for stroke and transient ischaemic attack in the following areas:

- [Aspirin](#)
- [Transient ischaemic attack \(TIA\) prediction rules](#)
- [TIA imaging](#)
- [Thrombectomy](#)
- [Blood pressure \(maintenance of homeostasis\)](#)
- [Very early mobilisation](#)
- [Head positioning](#)
- [Surgery \(decompressive hemicraniectomy\)](#)

Supplement

- [Methodology](#)

See the guideline [scope](#) for more information about why we decided to update this guideline.
