

# Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

## 1 Guideline

### **Melanoma: assessment and management of melanoma**

## 2 List of Modelling Questions

<b>Clinical questions by scope area</b>	<b>What is the most effective method of accurately staging melanoma in patients with clinicopathological stage IA-IIc melanoma?</b>
Population	Patients with clinicopathological stage IA-IIc melanoma?
Interventions considered for inclusion	<ul style="list-style-type: none"> <li>• Wide excision and nodal observation</li> <li>• Sentinel Lymph Node Biopsy alongside wide excision</li> </ul>
Type of analysis	Cost-utility analysis (CUA)

<b>Clinical questions by scope area</b>	<b>In asymptomatic patients who have undergone treatment with curative intent for melanoma, what is the optimal method, frequency and duration of follow-up?</b>
Population	Asymptomatic patients who have undergone treatment for Stage III melanoma with curative intent
Interventions considered for inclusion	<ul style="list-style-type: none"> <li>• Current follow-up</li> <li>• Current follow-up with the addition of routine imaging</li> </ul>
Type of analysis	Cost-utility analysis (CUA)
