Evidence reviews 2019

The following documents contain the evidence that was used to develop the recommendations:

- [Accessibility and sustainability of abortion services](#)
- [Information needs of women undergoing an abortion](#)
- Anti-D prophylaxis for women up to 13+6 weeks' gestation (replaced with [supporting document Q for the recommendations on anti-D prophylaxis](#))
- [Antibiotic prophylaxis for medical and surgical abortion](#)
- [VTE prophylaxis for women having abortion](#)
- [Abortion before ultrasound evidence](#)
- [Expulsion at home for early medical abortion](#)
- [Simultaneous versus delayed mifepristone + misoprostol administration for medical abortion up to 10+0 weeks' gestation](#)
- [Follow-up after medical abortion up to 10+0 weeks](#)
- [Misoprostol after mifepristone for inducing medical abortion between 10+1 and 24+0 weeks' gestation](#)
- [Medical versus surgical abortion between 13+0 and 24+0 weeks' gestation](#)
- [Medical abortion after 24 weeks' gestation](#)
- [Cervical priming before surgical abortion](#)
- [Anaesthesia or sedation for surgical abortion](#)
- [Support after abortion](#)
- [Contraception after abortion](#)

Other supporting evidence

- [Methods](#)
- [Health economics](#)
- [Supporting document Q for the recommendations on anti-D prophylaxis](#)
