has a conflict of interest with question 2.8 and cannot participate in discussion during agenda item 8. Due to a change in schedule on the day this agenda item was not discussed.

The Chair and a senior member of the Developer's team noted that the other interests declared did not prevent the attendees from fully participating in the meeting.

The Chair asked the Committee if it wanted any changes made to the minutes of the last meeting. The Committee suggested the following changes:

- Amend the description of the discussion under Item 6: Other issues, to the following:

“The committee discussed the role of law and how this would impact the guideline and its implementation in Wales and Northern Ireland. NICE staff confirmed that the relevant framework was the English legal framework, as the NICE is commissioned to make guidelines by NHS England. The GC should continue to make recommendations based on the available evidence of clinical and cost effectiveness. The wording of these recommendations will need to be structured with the relevant legal framework in mind.”

The Chair confirmed that all matters arising had been completed or were in hand.

2. Presentation on MIDs

The Chair introduced Kelly Williams, NGA Systematic Reviewer, who gave a presentation on minimal important difference (MIDs).

3. Presentation and discussion of review protocols

The Chair introduced Kelly Williams, NGA Systematic Reviewer, who led a discussion with the committee to finalise and sign off the protocols for the following review questions:

- 2.3 What is the optimal antibiotic prophylaxis regimen (including no antibiotic prophylaxis as an option) for women who are having medical termination of pregnancy?
- 2.4 What is the optimal antibiotic prophylaxis regimen for women who are having surgical termination of pregnancy?
- 2.6 What is the optimal regimen for cervical priming (including no cervical
