Obstetricians and Gynaecologists*

Disclaimer

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Local commissioners and/or providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the [Welsh Government](#), [Scottish Government](#), and [Northern Ireland Executive](#). All NICE guidance is subject to regular review and may be updated or withdrawn.

Review questions

Review questions	
A	Prevention of colorectal cancer
A1	How effective is aspirin in the prevention of colorectal cancer in adults with Lynch syndrome (hereditary nonpolyposis colorectal cancer)?
B	Molecular biomarkers
B1	Which predictive biomarkers should be used in the systemic management of colorectal cancer patients?
C	Management of local disease
C1	What is the most effective treatment for early rectal cancer?
C2	What is the effectiveness of preoperative radiotherapy or chemoradiotherapy for rectal cancer?
C3	What is the optimal surgical technique for rectal cancer?
C4	Which people having neoadjuvant chemotherapy or chemoradiotherapy for rectal cancer do not need surgery?
C5	What is the effectiveness of exenterative surgery for locally advanced or recurrent rectal cancer?
C6	Which people with early colon cancer can be treated with endoscopic resection alone?
C7	Which people with non-metastatic colon cancer would benefit from preoperative chemotherapy?
C8	What is the optimal duration of adjuvant chemotherapy for colorectal cancer?
C9	What is the effectiveness of stenting compared with emergency surgery for suspected colorectal cancer causing acute large bowel obstruction?
D	Management of metastatic disease
D1	Does surgery for the asymptomatic primary tumour improve outcomes for people with metastatic colorectal cancer, which cannot be treated with curative intent?
D2a	What is the optimal combination and sequence of treatments in patients presenting with metastatic colorectal cancer in the liver amenable to local treatment?
D2b	What is the optimal combination and sequence of treatments in patients presenting with metastatic colorectal cancer in the liver not amenable to local treatment?
D3	What is the optimal combination and sequence of treatments in patients presenting with metastatic colorectal cancer in the lung amenable to local treatment?
D4	What is the optimal combination and sequence of local and systemic treatments in patients presenting with metastatic colorectal cancer isolated in the peritoneum?
E	Ongoing care and support
E1	What are the optimal methods and frequencies of follow-up to detect recurrence after potentially curative surgical treatment for non-metastatic colorectal cancer?
E2	What is the optimal management of low anterior resection syndrome?
E3	What are the information needs of people prior, during and after treatment for colorectal cancer?
F	Service delivery
F1	Is there a relationship between surgical volumes and outcomes in the treatment of rectal cancer (primary and recurrent disease)?
