

January 2025 surveillance of myalgic encephalomyelitis (or encephalopathy)/chronic fatigue syndrome: diagnosis and management (NICE guideline NG206)

Surveillance report

Published: 24 January 2025

www.nice.org.uk

We checked the evidence on dietary management and strategies and found no new evidence that affects the recommendations.

Surveillance decision

We will not update this guideline. No new evidence was found since the guideline was published in October 2021 that would impact on current recommendations.
