

Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Type 2 diabetes: the management of type 2 diabetes in adults (update)

(Type 2 Diabetes)

2 List of Modelling Questions

Clinical questions by scope area	Pharmacological management of blood glucose levels – initial therapy
Population	People failing to manage their type 2 diabetes on diet and exercise alone
Interventions considered for inclusion	Any oral anti-diabetes drug (OAD) administered alone
Type of analysis	Cost utility analysis (CUA)

Clinical questions by scope area	Pharmacological management of blood glucose levels – first intensification of therapy
Population	People failing to manage their type 2 diabetes on a single OAD
Interventions considered for inclusion	Any 2 OADs in combination or oral anti-diabetes drug with glucagon-like peptide-1 (GLP-1) agonist
Type of analysis	CUA

Clinical questions by scope area	Pharmacological management of blood glucose levels – second intensification of therapy
Population	People failing to manage their type 2 diabetes on any 2 OADs in combination or OAD with GLP-1 agonist
Interventions considered for inclusion	Any 3 OADs, 2 OADs with a GLP-1 agonist or insulin with any combination of other drugs
Type of analysis	CUA
