Search strategies used for the complex fracture guideline are outlined below and were run in accordance with the methodology in the NICE guidelines manual 2012.<sup>1</sup> Final searches were run up between **25th March and 16th April 2015** (see individual questions for exact date). Any studies added to the databases after this date (even if they were published prior to this date) were not included unless specifically stated in the text. We do not routinely search for electronic, ahead of print or ‘online early’ publications. Where possible searches were limited to retrieve material published in English.

**Table 1: Database date parameters**

Database	Dates searched
Medline	1946 to between 25/03 & 16/04/2015
Embase	1980 to between 25/03 & 16/04/2015
The Cochrane Library	Cochrane Reviews to 2015 either Issue 3 of 12 or 4 of 12 CENTRAL to 2015 either Issue 2 of 12 or 3 of 12 DARE, HTA and NHSEED to 2015 Issue 1 of 4

Searches for the **clinical reviews** were run in Medline (OVID), Embase (OVID) and the Cochrane Library (Wiley). Additional searches were run in Cinahl for two questions

Searches for **intervention and diagnostic studies** were usually constructed using a PICO format where population (P) terms were combined with Intervention (I) and sometimes Comparison (C) terms. An intervention can be a drug, a procedure or a diagnostic test. Outcomes (O) are rarely used in search strategies for interventions. Search filters were also added to the search where appropriate.

Searches for the health economic reviews were run in Medline (OVID), Embase (OVID), the NHS Economic Evaluations Database (NHS EED), the Health Technology Assessment (HTA) database and the Health Economic Evaluation Database (HEED). NHS EED and HTA databases were hosted by the Centre for Research and Dissemination (CRD). Searches in NHS EED and HEED were constructed using population terms only. The Health Economic Evaluation Database (HEED) ceased production in 2014 with access ceasing in January 2015. For the final dates of HEED searches, please see individual economic questions. For Medline and Embase an economic filter (instead of a study type filter) was added to the same clinical search strategy.

## A.2 Population search strategies

There is no standard population search strategy for this guideline. Population search terms are included with the questions and intervention search terms in section A.4

## A.3 Study filter search terms

### A.3.1 Systematic review (SR) search terms

#### Medline search terms

1.	meta-analysis/
----	----------------

2.	meta-analysis as topic/
3.	(meta analy* or metanaly* or metaanaly*).ti,ab.
4.	((systematic* or evidence*) adj3 (review* or overview*)).ti,ab.
5.	(reference list* or bibliograph* or hand search* or manual search* or relevant journals).ab.
6.	(search strategy or search criteria or systematic search or study selection or data extraction).ab.
7.	(search* adj4 literature).ab.
8.	(medline or pubmed or cochrane or embase or psychlit or psyclit or psychinfo or psycinfo or cinahl or science citation index or bids or cancerlit).ab.
9.	cochrane.jw.
10.	((multiple treatment* or indirect or mixed) adj2 comparison*).ti,ab.
11.	or/1-10

#### Embase search terms

1.	systematic review/
2.	meta-analysis/
3.	(meta analy* or metanaly* or metaanaly*).ti,ab.
4.	((systematic or evidence) adj3 (review* or overview*)).ti,ab.

## A.4 Searches for specific questions

### A.4.1 Open fractures - immediate destination

1. Is it clinically and cost effective suspected open limb fractures to be directly transported to a Major Trauma Centre?

Search constructed by combining the columns in the following table using the AND Boolean operator.  
Exclusion filter applied using NOT Boolean operator.

Population	Intervention or exposure	Comparison	Study design filter	Date parameters and other limits
Open fractures.	Destination	n/a	n/a	See Table 1 Date of last search: 13/04/2015 English only Exclusion filter applied in Medline and Embase
