

Version 1.0

Pancreatic Cancer in adults: diagnosis and management

Appendix G

Excluded studies

31 July 2017

Draft for Consultation

*Developed by the National Guideline Alliance, hosted
by the Royal College of Obstetricians and
Gynaecologists*

Disclaimer

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Local commissioners and/or providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the Welsh Government, Scottish Government, and Northern Ireland Executive. All NICE guidance is subject to regular review and may be updated or withdrawn.

1 Appendix G: Excluded studies

G.1.2 People with jaundice

| Study | Reason for Exclusion |
|---|---|
| Admassie D, H/Yesus A, Denke A. Validity of ultrasonography in diagnosing obstructive jaundice. East Afr Med J. 2005 Jul;82(7):379-81. | PATIENTS were recruited before 2000 (1998-2000) |
| Aslanian, H. R., Estrada, J. D., Rossi, F., Dziura, J., Jamidar, P. A., Siddiqui, U. D., Endoscopic ultrasound and endoscopic retrograde cholangiopancreatography for obstructing pancreas head masses: combined or separate procedures?, Journal of Clinical Gastroenterology, 45, 711-3, 2011 | No outcome data (this paper doesn't report sufficient data about the diagnostic specificity, sensitivity and accuracy) |
| Duraker, N., Hot, S., Polat, Y., Hobek, A., Gencler, N., Urhan, N., CEA, CA 19-9, and CA 125 in the differential diagnosis of benign and malignant pancreatic diseases with or without jaundice, Journal of Surgical Oncology, 95, 142-7, 2007 | No index/reference test |
| Karki, S., Joshi, K. S., Regmi, S., Gurung, R. B., Malla, B., Role of ultrasound as compared with ERCP in patient with obstructive jaundice, Kathmandu University medical journal (KUMJ), 11, 237-40, 2013 | Not relevant to the research question: this prospective study involves 88 jaundiced patients without a suspicion of having PC (the aim was to compare the role of ultrasound with ERCP and to determine the major causes of obstructive jaundice. |
| Marrelli, D., Caruso, S., Pedrazzani, C., Neri, A., Fernandes, E., Marini, M., Pinto, E., Roviello, F., CA19-9 serum levels in obstructive jaundice: clinical value in benign and malignant conditions, American journal of surgery, 198, 333-9, 2009 | No relevant to the research question: no patients suspected of having PC |
| Mathew, R. P., Moorkath, A., Basti, R. S., Suresh, H. B., Value and accuracy of multidetector computed tomography in obstructive jaundice, Polish Journal of Radiology, 81, 303-309, 2016 | No patients type (this prospective study involves 50 patients with clinically suspected obstructive jaundice - pancreatic cancer was present only in 10 patients. The aim was to evaluate the diagnostic accuracy of MDCT in the evaluation of obstructive jaundice with regards to the level and cause of obstruction- differentiating between benign and malign masses- no pancreatic cancer) |
| Munigala, S., Tummala, P., Krishna, N. B., Agarwal, B., Prevalence of panreatobiliary malignancy in patients presenting with obstructive jaundice and biliary stricture or mass lesion on CT/MRI scans and evaluation of EUS-FNA in their management, Gastrointestinal Endoscopy, 73, AB245, 2011 | No publication type: conference abstract |
| Munir K, Bari V, Yaqoob J, Khan DB, Usman MU. The role of magnetic resonance cholangiopancreatography (MRCP) in obstructive jaundice. J Pak Med Assoc. 2004 Mar;54(3):128-32. PubMed PMID: 15129871. | Not relevant to the research question (no patients with suspected PC) |
| Singh, A., Mann, H. S., Thukral, C. L., Singh, N. R., Diagnostic accuracy of MRCP as compared to ultrasound/CT in patients with obstructive jaundice, Journal of Clinical and Diagnostic Research, 8, 103-7, 2014 | Not relevant to the research question (no patients with suspected PC) |

| Study | Reason for Exclusion |
|--|---|
| Tonack, S., Jenkinson, C., Cox, T., Elliott, V., Jenkins, R. E., Kitteringham, N. R., Greenhalf, W., Shaw, V., Michalski, C. W., Friess, H., Neoptolemos, J. P., Costello, E., iTRAQ reveals candidate pancreatic cancer serum biomarkers: influence of obstructive jaundice on their performance, British Journal of Cancer Br J Cancer, 108, 1846-53, 2013 | No index test of interest |
| Tummala, P., Munigala, S., Agarwal, B., EUS-FNA can obviate a large number of unnecessary surgeries while missing very few potentially resectable pancreatic cancers in jaundiced patients with suspected pancreatic cancer, Pancreas, 40, 1359, 2011 | Conference abstract |
| Vaishali, M. D., Agarwal, A. K., Upadhyaya, D. N., Chauhan, V. S., Sharma, O. P., Shukla, V. K., Magnetic resonance cholangiopancreatography in obstructive jaundice, Journal of clinical gastroenterology, 38, 887-90, 2004 | Not relevant to the research question: no patients suspected of having PC |
| Wang, S. B., Wu, H. B., Wang, Q. S., Zhou, W. L., Tian, Y., Ji, Y. H., Lv, L., 18F-FDG PET/CT in differentiating malignant from benign origins of obstructive jaundice, Hepatobiliary and Pancreatic Diseases International, 14, 516-522, 2015 | 85 people with clinical confirmation of obstructive jaundice - no with suspected pancreatic cancer. The aim was to evaluate the role of 18F-FDG PET/CT in differentiating malignant from benign origins of obstructive jaundice and to quantify the added value of 18F-FDG PET/CT over conventional imaging (enhanced CT and/or MRI)) |
| Xing, G. S., Geng, J. C., Han, X. W., Dai, J. H., Wu, C. Y., Endobiliary brush cytology during percutaneous transhepatic cholangiodrainage in patients with obstructive jaundice, Hepatobiliary and Pancreatic Diseases International, 4, 98-103, 2005 | Not relevant to the research question: no patients suspected of having PC |

G.2.1 People without jaundice but with a pancreatic abnormality

| Study | Reason for Exclusion |
|---|---|
| Abdallah, E. S. M., Ali, M. I. M., Awadallah, M. Y., El Ghawabi, H. S. H., Role of diffusion weighted imaging in characterization of pancreatic pathology, Egyptian Journal of Radiology and Nuclear Medicine, 47, 723-727, 2016 | No relevant data |
| Affolter, K. E., Schmidt, R. L., Matynia, A. P., Adler, D. G., Factor, R. E., Needle size has only a limited effect on outcomes in EUS-guided fine needle aspiration: a systematic review and meta-analysis, Digestive Diseases & Sciences Dig Dis Sci, 58, 1026-34, 2013 | No relevant data |
| Afify, A. M., al-Khafaji, B. M., Kim, B., Scheiman, J. M., Endoscopic ultrasound-guided fine needle aspiration of the pancreas. Diagnostic utility and accuracy, Acta cytologica, 47, 341-8, 2003 | No data on whether lesions cystic/solid or both |
| Agarwal, B., Abu-Hamda, E., Molke, K. L., Correa, A. M., Ho, L., Endoscopic ultrasound-guided fine needle aspiration and multidetector spiral CT in the diagnosis of pancreatic cancer, American Journal of Gastroenterology, 99, 844-50, 2004 | Most part of patients were included if the clinical suspicion of pancreatic cancer was based on (1) obstructive jaundice with biliary stricture seen on ERCP- n = 47) |
| Agarwal, B., Krishna, N. B., Labundy, J. L., Safdar, R., Akduman, E. I., EUS and/or EUS-guided FNA in patients with CT and/or magnetic resonance imaging findings of enlarged pancreatic head | Sample excludes patients with identifiable focal mass lesions |

| Study | Reason for Exclusion |
|---|---|
| or dilated pancreatic duct with or without a dilated common bile duct, Gastrointestinal Endoscopy, 68, 237-42; quiz 334, 335, 2008 | |
| Aithal, G. P., Anagnostopoulos, G. K., Tam, W., Dean, J., Zaitoun, A., Kocjan, G., Ragunath, K., Pereira, S. P., EUS-guided tissue sampling: comparison of "dual sampling" (Trucut biopsy plus FNA) with "sequential sampling" (Trucut biopsy and then FNA as required), Endoscopy, 39, 725-30, 2007 | Lesions identified by clinical findings |
| Alsibai, K. D., Denis, B., Bottlaender, J., Kleinclaes, I., Straub, P., Fabre, M., Impact of cytopathologist expert on diagnosis and treatment of pancreatic lesions in current clinical practice. B, Fathi, M, Comparison between CT-scan and trans-abdominal sonography in celiac and splanchnic plexus blocks in patients with advanced pancreatic head cancer, Tanaffos, 8, 51-7, 2009 | No sufficient data reporting to be summarised (Randomised prospective double-blinded study comparing CT and EUS- guided plexus block (methods not reported and outcomes data reported without any variance estimates) |

G.91 Nutritional Interventions

| Study | Reason for Exclusion |
|---|--|
| Barber, M. D., Fearon, K. C., Tisdale, M. J., McMillan, D. C., Ross, J. A., Effect of a fish oil-enriched nutritional supplement on metabolic mediators in patients with pancreatic cancer cachexia, Nutrition & CancerNutr Cancer, 40, 118-24, 2001 | No study design - this study was uncontrolled (non-comparative).Only 28 patients |
| Barber, M. D., McMillan, D. C., Preston, T., Ross, J. A., Fearon, K. C., Metabolic response to feeding in weight-losing pancreatic cancer patients and its modulation by a fish-oil-enriched nutritional supplement, Clinical ScienceClin Sci (Colch), 98, 389-99, 2000 | No population -This study includes 16 weight-losing, non-diabetic patients with unresectable pancreatic adenocarcinoma and six healthy control (without PC). Therefore was excluded. |
| Barber, M. D., Ross, J. A., Preston, T., Shenkin, A., Fearon, K. C., Fish oil-enriched nutritional supplement attenuates progression of the acute-phase response in weight-losing patients with advanced pancreatic cancer, Journal of NutritionJ Nutr, 129, 1120-5, 1999 | This prospective cohort study was excluded why higher evidence for this comparison (Bauer 2005, Fearon 2003) has present. |

| Study | Reason for Exclusion |
|--|---|
| Barber, M. D., Ross, J. A., Voss, A. C., Tisdale, M. J., Fearon, K. C., The effect of an oral nutritional supplement enriched with fish oil on weight-loss in patients with pancreatic cancer, British Journal of Cancer, 81, 80-6, 1999 | No study design - the aim of this study was to determine if a combination of EPA with a conventional oral nutritional supplement could produce weight gain in PC patients, BUT THE STUDY WAS uncontrolled |
| Bauer, J., Capra, S., Battistutta, D., Davidson, W., Ash, S., Cancer Cachexia Study, Group, Compliance with nutrition prescription improves outcomes in patients with unresectable pancreatic cancer, Clinical Nutrition, 24, 998-1004, 2005 | No intervention/comparison of interest – this RCT aimed, in a post hoc analysis, to examine the effect of dietary compliance on intake and body composition in patients with unresectable PC. The participant were stratified in two groups based on compliance with the nutrition prescription of consumption of a minimum of 1.5 cans/day of an energy and protein dense oral nutrition supplement±EPA. |
| Berry, A. J., Pancreatic enzyme replacement therapy during pancreatic insufficiency, Nutrition in Clinical Practice, 29, 312-21, 2014 | No population - This trial doesn't report outcomes of interest and as well doesn't provide sufficient details about the study population characteristics. |
| Braga, M., Bissolati, M., Rocchetti, S., Beneduce, A., Pecorelli, N., Di Carlo, V., Oral preoperative antioxidants in pancreatic surgery: a double-blind, randomized, clinical trial, NutritionNutrition, 28, 160-4, 2012 | No population - This trial doesn't report outcomes of interest and as well doesn't provide sufficient details about the study population characteristics. |
| Chabot, J. A., Tsai, W. Y., Fine, R. L., Chen, C., Kumah, C. K., Antman, K. A., Grann, V. R., Pancreatic proteolytic enzyme therapy compared with gemcitabine-based chemotherapy for the treatment of pancreatic cancer, Journal of Clinical Oncology, 28, 2058-2063, 2010 | This prospective cohort study was excluded why didn't include a relevant control according the study protocol (Pancreatic enzyme therapy versus chemotherapy) and also because a higher study design was included that evaluated the effectiveness of Pancreatic enzyme therapy (Bruno 1998) |
| Davidson W, Ash S, Capra S, Bauer J; Cancer Cachexia Study Group. Weight stabilisation is associated with improved survival duration and quality of life in unresectable pancreatic cancer. Clin Nutr. 2004 Apr;23(2):239-47. | This was a post hoc analysis of Fearon et al., (2003) and was excluded from the review, as the study design was not appropriate. The aim of this study was to determine whether stabilising weight loss for patients with unresectable PC was associated with improved survival and quality of life, but want clear the methods used to pool data and to keep the randomisation from the original RCT (Fearon 2003) |
| Di Carlo, V., Gianotti, L., Balzano, G., Zerbi, A., Braga, M., Complications of pancreatic surgery and the role of perioperative nutrition, Digestive surgery, 16, 320-6, 1999 | This RCT involves 100 patients and it is likely to be an interim analysis of a more recent RTC (N=212) which compares the same interventions, focusing on the same outcomes, come from the same study setting (Italy – S. Raffaele hospital) and has the same Authorship (Giannotti et al. |

| Study | Reason for Exclusion |
|--|---|
| | 2000). Therefore has been excluded from the review. |
| Falconi, M., Contro, C., Ballabio, M., Bassi, C., Salvia, R., Pederzoli, P., Evaluation of lanreotide effects on human exocrine pancreatic secretion after a single dose: preliminary study, <i>Digestive & Liver Disease</i> <i>Dig Liver Dis</i> , 34, 127-32, 2002 | No study design - cross-over trial of 7 patients |
| Gartner, S., Kruger, J., Aghdassi, A. A., Steveling, A., Simon, P., Lerch, M. M., Mayerle, J., Nutrition in Pancreatic Cancer: A Review, <i>Gastrointestinal Tumors</i> <i>Gastrointest</i> , 2, 195-202, 2016 | No study design - This review evaluates the different nutritional therapies on nutritional status, quality of life and survival in PC - but do not meta-analyses the outcomes data of the included studies. |
| Hallay, J., Micskei, C., Fulesdi, B., Kovacs, G., Szentkereszty, Z., Takacs, I., Sipka, S., Bodolay, E., Sapy, P., Use of three lumen catheter facilitates bowel movement after pancreateo-duodenectomy, <i>Hepato-Gastroenterology</i> <i>Hepatogastroenterology</i> , 55, 1099-102, 2008 | No intervention of interest |
