

# Ganaxolone for treating seizures caused by CDKL5 deficiency disorder in people 2 years and over

Information for the public

Published: 12 February 2025

[www.nice.org.uk](http://www.nice.org.uk)

Ganaxolone (Ztalmy) is not normally available on the NHS for treating seizures caused by cyclin-dependent kinase-like 5 (CDKL5) deficiency disorder in people aged 2 years and over.

Your doctor should talk with you about other treatment options. If you are already having it, you should be able to continue until you and your doctor decide when best to stop.

## Information and support

[CDKL5 UK](#) ([admin@curecdkl5.org](mailto:admin@curecdkl5.org)) can give you advice and support.

You can also get support from your local [Healthwatch](#).
