

Efgartigimod for treating antibody-positive generalised myasthenia gravis

Information for the public

Published: 4 June 2025

www.nice.org.uk

Efgartigimod (Vyvgart) is not normally available on the NHS as an add-on to standard treatment for generalised myasthenia gravis in adults who test positive for anti-acetylcholine receptor antibodies. Your healthcare professional should talk with you about other treatment options. If you are already having it, you should be able to continue until you and your healthcare professional decide when best to stop.

Information and support

The [NHS webpage on myasthenia gravis](#) may be a good place to find out more.

These organisations can give you advice and support:

- [Myaware](#), 01332 290 219
- [Muscular Dystrophy UK](#), 0800 652 6352

You can also get support from your local [Healthwatch](#).
