

Deuruxolitinib for treating severe alopecia areata

Information for the public

Published: 15 July 2026

www.nice.org.uk

Deuruxolitinib (Leqselvi) is available on the NHS as a possible treatment for severe alopecia areata in adults.

Is this treatment right for me?

Your healthcare professionals should give you clear information, talk with you about your options and listen carefully to your views and concerns. Your family can be involved too, if you wish. See [our webpage on shared decision making](#).

Questions to think about

- How well does it work compared with other treatments?
- What are the risks or side effects? How likely are they?
- How will the treatment affect my day-to-day life?
- What happens if the treatment does not work?
- What happens if I do not want to have treatment? Are there other treatments available?

Information and support

The [NHS webpage on hair loss](#) may be a good place to find out more.

[Alopecia UK](#) (email info@alopecia.org.uk) can give you advice and support.

You can also get support from your local [Healthwatch](#).
