Pemetrexed disodium for the treatment of malignant pleural mesothelioma

Liz Darlson (Nurse Consultant)

Introduction

With a membership of over 380,000 registered nurses, midwives, health visitors, nursing students, health care assistants and nurse cadets, the Royal College of Nursing (RCN) is the voice of nursing across the UK and the largest professional union of nursing staff in the world. The RCN promotes patient and nursing interests on a wide range of issues by working closely with Government, the UK parliaments and other national and European political institutions, trade unions, professional bodies and voluntary organisations.

Assessment Report - Comments

The Royal College of Nursing (RCN) welcomes the opportunity to comment on the assessment report for the above health technology appraisal on the use of pemetrexed disodium for the treatment of malignant pleural mesothelioma.

The report is very interesting and comprehensive and we welcome it.

We agree with the interpretation of the evidence base and have nothing further to add at this stage of the appraisal.
