Equality impact assessment – Guidance development

**STA selpercatinib for RET fusion-positive advanced non-
small-cell lung cancer**

The impact on equality has been assessed during this appraisal according to the principles of the NICE equality scheme.

Consultation

1. Have the potential equality issues identified during the scoping process been addressed by the committee, and, if so, how?
None identified

2. Have any other potential equality issues been raised in the submissions, expert statements or academic report, and, if so, how has the committee addressed these?
None identified

3. Have any other potential equality issues been identified by the committee, and, if so, how has the committee addressed these?
None identified

4. Do the preliminary recommendations make it more difficult in practice for a specific group to access the technology compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?
--

Technology appraisals: Guidance development
Equality impact assessment for the single technology appraisal of selpercatinib for RET fusion-positive non-small-cell lung cancer

No

5. Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

No

6. Are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligations to promote equality?

No

7. Have the committee's considerations of equality issues been described in the appraisal consultation document, and, if so, where?

Not Applicable
