Advice

NICE is unable to make a recommendation about the use in the NHS of ruxolitinib for treating acute graft versus host disease refractory to corticosteroids in people aged 12 and over. This is because Novartis has confirmed that it does not intend to make an evidence submission for the appraisal. Novartis considers that the technology is unlikely to be a cost-effective use of NHS resources based on the current price in existing indications.

Information

If NHS organisations wish to consider ruxolitinib for this indication, they should follow the advice on rational local decision making in the [NHS Constitution for England](#) and the [NHS Commissioning Board and Clinical Commissioning Groups \(Responsibilities and Standing Rules\) Regulations 2012](#). This outlines the approach that should be taken when there is no NICE guidance.

NICE will review the position if the company decides that it wants to make an evidence submission.
