

Cancer: review within 12 months

NICE indicator

Published: 16 September 2020

www.nice.org.uk/indicators/ind223

Indicator

The percentage of patients with cancer, diagnosed within the preceding 24 months, who have a patient Cancer Care Review using a structured template within 12 months of diagnosis.

Indicator type

General practice indicator suitable for use in the Quality and Outcomes Framework.

This document does not represent formal NICE guidance. For a full list of NICE indicators, see our [menu of indicators](#).

To find out how to use indicators and how we develop them, see our [NICE indicator process guide](#).

Rationale

This indicator aims to encourage GP practices to conduct a cancer care review which represents an initial opportunity to address patients' needs for individual assessment, care planning and ongoing support and information requirements at a time which is appropriate for the individual patient.

Source guidance

Patient experience in adult NHS services. NICE guideline CG138 (2012), recommendations 1.1.1, 1.3.4, 1.3.5.

Specification

Numerator: The number of patients in the denominator who have had a patient Cancer Care Review using a structured template recorded as occurring within 12 months of diagnosis.

Denominator: The number of patients diagnosed with cancer in the preceding 24 months.

Calculation: Numerator divided by the denominator, multiplied by 100.

Exclusions: Patients with a diagnosis of non-melanomatous skin lesions.

Minimum population: The indicator would be appropriate to assess performance at individual general practice level.
