Indicator Equality Impact Assessment

Topic: IND237 Register

- 1.1 Have any potential equality issues been identified during the development process?

Yes. Coding of ethnicity may be poor in some practices. Using the lower threshold of 23 kg/m² unless ethnicity is specifically recorded as White will help ensure that people are not excluded from the register inappropriately because ethnicity was not recorded.

- 1.2 Have any population groups, treatments or settings been excluded from coverage by the indicator? Are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

No.

- 1.3 Does the indicator make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

No.

- 1.4 Is there potential for the indicator to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

No.
