<b>Mary Braine - Lecturer</b>	
Personal pecuniary	None
Personal family interest	None
Non-personal pecuniary interest	Sponsorship from various organisations including Medtronic in support of the annual conference for the British Association of Neuroscience Nurses which I am co-ordinating. Also on the Associations website. (declared 03.09.09)
Personal non-pecuniary interest	Approach to teach on a hydrocephalus study day sponsored by Medtronic. (declared 03.09.09) Medtronic currently sponsor the National Neuroscience Benchmark website, along with Codman & Integra. I have contributed to Medtronic & Codman's education programme in the past but this has not been TLOC related.
<b>Paul Cooper – Chair, Consultant Neurologist</b>	
Personal pecuniary interest	Small personal shareholdings in GSK and in Shire Pharmaceuticals, held within ISA managed with advice from my stockbroker. Total of both together approximately £5-6000. I have received modest honoraria for speaking at meetings from most of the major pharma companies with epilepsy products. My clinical session at the David Lewis Centre is subcontracted from my NHS Trust, but I receive an additional annual honorarium in recognition of my role as Medical Director (declared 26.11.07)  I have done paid consultancy work for special products on a new treatment for status/recurrent seizures? (declared 07.08)  Received travel, accommodation & registration expenses for 2008 AES in Seattle (declared 07.08?)  Honorarium for speaking on TLOC at workshop supported by grant from UCB Pharma (declared 06.09)
Personal family interest	None
Non-personal pecuniary interest	I am lead investigator, and co-investigator on two pharmaceutical company supported clinical drug trials in epilepsy, and on a study funded by Medtronic Inc. investigating cardiac arrhythmias in patients with blackouts. (declared 26.11.07)  I organised a meeting at the Royal College of Physicians which received some financial support from Medtronic Inc. (declared 30.7.8)  Future work which is in the early planning stage would involve an application to the MRC ReJuMEC cohort study. Any involvement with Medtronic would be of the form of them providing funding for translational research with the MRC, and
