### Clinical guideline

CG143: Management of an acute painful sickle cell episode in hospital

### Publication date

June 2012

### Surveillance decision for GE

May 2014

### Key findings

			Potential impact on guidance	
			Yes	No
Evidence from Evidence Update				✓
Anti-discrimination and equalities considerations				✓
No update	Rapid update	Standard update	Transfer to static list	Change review cycle
✓				

### Surveillance proposal

Further to the consideration by GE of the Evidence Update on CG143: Management of an acute painful sickle cell episode in hospital (submitted alongside this paper) where no impacts were identified, GE is asked to consider the proposal to not update the guideline at this time.

## Centre for Clinical Practice – Surveillance Programme

### Surveillance review of CG143: Management of an acute painful sickle cell episode in hospital

#### ***Background information***

Guideline issue date: 2012

2 year review: 2014

NCC: Internal Clinical Guidelines

#### ***Current two year surveillance***

1. The Evidence Update on CG143: Management of an acute painful sickle cell episode in hospital (expected publication date: May 2014) was used as the primary source of evidence for this surveillance decision(search dates: 1 May 2011 to 10 January 2014).
2. The Evidence Update indicates that there is currently insufficient new evidence to invalidate the existing guideline recommendations. A summary of the evidence is provided in the Evidence Update. Therefore the Surveillance Programme recommends no update at this time.

#### ***On-going Research***

3. Not considered at 2 year review point.

#### ***Anti-discrimination and equalities considerations***

4. None identified through the Evidence Update.

#### ***Implications for other NICE programmes***

5. None identified through the Evidence Update.

***Surveillance recommendation***

6. GE is asked to consider the proposal to not update the guideline at this time. GE are asked to note that as a 2 year surveillance decision this 'no to update' proposal will not be consulted on.
