

# Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

## 1 Guideline

“Suspected cancer: recognition and management of suspected cancer in children, young people and adults”

## 2 List of Modelling Questions

<b>Clinical questions by scope area</b>	Which investigations of symptoms of suspected colorectal cancer should be done with clinical responsibility retained by primary care?
Population	Patients with low and moderate risk symptoms suggestive of colorectal cancer
Interventions considered for inclusion	<ul style="list-style-type: none"> <li>• Guaiac-based Fecal Occult Blood (FBOT)</li> <li>• immunochemical-based FOBT</li> <li>• Colonoscopy</li> <li>• Flexible Sigmoidoscopy</li> <li>• Barium Enema</li> <li>• CT Colonography</li> </ul>
Type of analysis	Cost-utility analysis (CUA)
