Review of NICE technology appraisal guidance 128; Stapled haemorrhoidopexy for the treatment of haemorrhoids

Decision to move the existing guidance to the ‘static guidance’ list – April 2016

The Institute was proposing that the existing guidance should be moved to the ‘static guidance’ list.

After consideration of all of the comments received during the Review Consultation, the Technology Appraisals programme has decided to proceed with this proposal.

TA128 will consequently move to the [‘static guidance’ list](#). Topics on the static list can be considered for review if any new evidence becomes available that is likely to lead to a change in the existing recommendations.
