RPP decision paper

Review of TA304; Arthritis of the hip (end stage) – hip replacement (total) and resurfacing arthroplasty

Final recommendation post consultation

The technology appraisal programme recommends that, as proposed to consultees, TA304 is transferred to the 'static guidance list'.

1. Background

This guidance was issued in January 2014.

At the GE meeting of 31 January 2017 it was agreed that we would consult on the recommendations made in the GE proposal paper. A four week consultation has been conducted with consultees and commentators and the responses are presented below.

2. Proposal put to consultees and commentators

The guidance should be transferred to the 'static guidance list'.

3. Rationale for selecting this proposal

No new evidence or ongoing research has been identified that is likely to alter the conclusions of the guidance (that is, lead to a change in clinical and cost effectiveness of treatment).

4. Summary of consultee and commentator responses

Comments received in the course of consultations carried out by NICE are published in the interests of openness and transparency, and to promote understanding of how recommendations are developed. The comments are published as a record of the submissions that NICE has received, and are not endorsed by NICE, its officers or advisory committees.
