17 August 2004

Dear Sarah,

**Health Technology Appraisal – Tooth Decay: HealOzone
Submission from the Faculty of General Dental Practitioners (UK)**

It was a pleasure to meet you during the consultee information meeting on 22 June 2004. Thank you for the amended protocol dated 1 July 2004.

During the meeting you invited submissions from the organisations who had representatives present, together with the names of suggested subject experts, and asked that this information reached you by 20 August 2004.

We have little to add to the comments made during the consultee information meeting and feel that the revised protocol is well structured and asks the right questions. Since the meeting, the Cochrane Oral Health Group has published its findings on the effectiveness of Ozone as a treatment to limit or reverse dental caries. We are sure that your reviewers will take this report into consideration.

As far as subject experts are concerned, we recommend the following:

Professor Nigel B. Pitts,
Dental Health Services Research Unit
University of Dundee
Mackenzie Building
Kirsty Semple Way
Dundee
DD2 4BF

Professor Edwina Kidd
GKT Dental Institute
Guy's Tower
King's College London – Guy's Hospital
London
SE1 9RT

Dr. Paul Ashley
Department of Children's Dentistry
Eastman Dental Institute and Hospital
University College London
256, Gray's Inn Road
London
WC1X 8LD

We wish you well with the project and would be happy to help in any way, if requested.

Yours sincerely,
